Tallahassee, FL – Today, CDR Health, an affiliate of CDR Maguire, Inc., one of the state’s leading COVID-19 testing and vaccination logistics providers, proudly announces the administration of 1 million vaccines in Florida through its vaccine data management system, CDR HealthPro™. CDR Health, in partnership with Coastal Cloud, has supported the State of Florida and the Florida Department of Health since the beginning of the pandemic with their tireless efforts spanning 49 counties, including Hillsborough, Pinellas, Orange, Pasco, and Hernando Counties.

CEO Tina Vidal-Duart said, “We are incredibly proud to be a part of the COVID-19 vaccination process in our home state of Florida. To reach this milestone in three months— including administering over 30,000 shots in one day and averaging less than 30 minutes per vaccination from check-in to release — is a testament to our comprehensive vaccination solution and the strength of our partnerships with the State of Florida and all of our local partners.”

CDR Health partnered with another Florida-based company, Coastal Cloud, to develop a proprietary management and logistics software, CDR HealthPro™, which has been used to register over 2 million residents for COVID-19 testing and vaccinations. Designed on a custom Salesforce platform, the system serves as a full turnkey vaccine data management solution— one of the first of its kind— tracking the vaccination process from patient registration and scheduling through checkout at the vaccination site. The system provides integrated registration and scheduling, onsite vaccine operational workflow, and real time data reporting for county, state, and federal partners all via one streamlined portal.

“Since the pandemic began, we have worked with the federal, state and local governments on COVID testing and vaccinations,” said Sara Hale, Co-Founder and Managing Partner of Coastal Cloud. “We are proud to be able to say our partnership with CDR Maguire has helped more than 1 million Floridians – mostly senior citizens – who are now able to safely shop at the grocery store, work, or see friends and family, some for the first time in a year.”

Cathy, an Orange County resident, said of one of CDR Health’s vaccine sites, “You have done it so well. Just told some friends this is the place to get vaccinated. Smooth and seamless operation. The CDR [Health] system is brilliant, too! All our records in one, safe place. Amazing!”

In addition to FEMA, state-operated, and county and regional vaccination sites, CDR Health has also led efforts to vaccinate residents and staff at long term care facilities across Florida, including Assisted Living Facilities, minority communities and Centers for Independent Living. Additional endeavors of door-to-door canvassing teams and vaccinations for homebound seniors have amounted to them proudly administering over 150,000 vaccines in these communities.

*CDR Maguire's healthcare team have been providing vaccination data management and staff augmentation services since vaccines first became available in the State of Florida. CDR's proprietary software, CDR HealthPro™, is designed to collect and keep track of patient data, integrating all patient, county, state, and federal needs into one streamlined portal. In addition, CDR has provided PCR, Antibody and Antigen COVID-19 test kits, laboratory services, patient notification, testing site logistics and management, medical supplies and PPE, and field hospital oversight and management to the Florida Division of Emergency Management and several counties since the start of the COVID-19 pandemic.*
